Remarks on the examination of recruits, intended for the use of young medical officers

By Hampden Hugh Massy

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 48 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1854 Excerpt: . . . that a stiff finger results after an operation. This is very likely to happen if disease has been the cause of amputation, but may result from the inflammation consequent upon injury or amputation; this complication would create an important difference; a completely stiff finger is a serious obstacle and ought to cause unfitness in a recruit, as being not only useless but in the way, materially interfering with the appliances of the hand. Contracted fingers are altogether objectionable; they unfit a man in nearly every relation to his duty, weakening the hand, causing awkwardness, and impeding him almost universally. I am aware that the fingers enumerated as admitting of amputation the flexor tendons. Did this affection not produce very great contraction it might escape detection, under a cursory examination; yet it should always disqualify, since it usually ends in the complete contraction of the finger or...
