

Communications from the Kamerlingh Onnes Laboratory of the University of Leiden Volume 97-108

Filesize: 4.34 MB

Reviews

The publication is easy in read through preferable to fully grasp. It is writter in simple phrases instead of hard to understand. You will not sense monotony at at any moment of your respective time (that's what catalogs are for concerning if you request me).

(Kevin Bergstrom Sr.)

COMMUNICATIONS FROM THE KAMERLINGH ONNES LABORATORY OF THE UNIVERSITY OF LEIDEN VOLUME 97-108

To get **Communications from the Kamerlingh Onnes Laboratory of the University of Leiden Volume 97-108** eBook, remember to access the button beneath and download the ebook or have access to other information which are related to COMMUNICATIONS FROM THE KAMERLINGH ONNES LABORATORY OF THE UNIVERSITY OF LEIDEN VOLUME 97-108 book.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1908 Excerpt: .been u (1--1 fc) much larger. The correction mentioned in the beginning of this will not affect this conclusion. On the supposition that at least when the dimensions of the volume elements in which appreciable condensations or rarefactions i) M. W. Tralers ai.d F L. Umm. Pioc. fioj. Soc. A. 78 (190C) p 247. are found, are small with respect to the wavelength, the intensity of the scattered light is proportional to the square of the quantity of substance which has condensed round every centrum, or to the square of the mean deviation in density governed by the statistic equilibrium it follows that our observations rather support the hypothesis of the condensations and the rarefactions caused by the molecular movement and governed by the statistic equilibrium, than the hypothesis of centres of attraction whose number remains constant with varying temperature. If it appears from further investigations that the absolute value of the intensity of the light scattered by the mist is in harmony with what is to be expected according to the distribution law of Boltzmann (cf. Smoluchow8ki, loc. cit.) a connection may be formed between the observations of the intensity of the light scattered by the mist and the disturbance function in the equation of state in the neighbourhood of the critical point through considerations on the increase of the virial of attraction in consequence of the differences of density). 6. Remarks on further experiments on the tnist in the neighbourhood of the critical...
