

High-Frequency Planetary Waves in the Polar Middle Atmosphere as Seen in a Data Assimilation System

Filesize: 6.8 MB

Reviews

Very beneficial to any or all group of folks. I was able to comprehend everything using this composed e ebook. I am pleased to inform you that here is the finest publication i have study inside my individual daily life and might be he very best pdf for actually.
(Brielle Hilpert)

HIGH-FREQUENCY PLANETARY WAVES IN THE POLAR MIDDLE ATMOSPHERE AS SEEN IN A DATA ASSIMILATION SYSTEM

To get **High-Frequency Planetary Waves in the Polar Middle Atmosphere as Seen in a Data Assimilation System** eBook, you should access the web link under and save the document or have accessibility to additional information that are highly relevant to HIGH-FREQUENCY PLANETARY WAVES IN THE POLAR MIDDLE ATMOSPHERE AS SEEN IN A DATA ASSIMILATION SYSTEM ebook.

Bibliogov, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This study examines the winter southern hemisphere vortex of 1998 using four times daily output from a data assimilation system to focus on the polar 2-day, wave number 2 component of the 4-day wave. The data assimilation system products are from a test version of the finite volume data assimilation system (fvDAS) being developed at Goddard Space Flight Center (GSFC) and include an ozone assimilation system. Results show that the polar 2-day wave dominates during July 1998 at 70 degrees. The period of the quasi 2-day wave is somewhat shorter than 2 days (about 1.7 days) during July 1998 with an average perturbation temperature amplitude for the month of over 2.5 K. The 2-day wave propagates more slowly than the zonal mean zonal wind, consistent with Rossby wave theory, and has EP flux divergence regions associated with regions of negative horizontal potential vorticity gradients, as expected from linear instability theory. Results for the assimilation-produced ozone mixing ratio show that the 2-day wave represents a major source of ozone variation in this region. The ozone wave in the assimilation system is in good agreement with the wave seen in the POAM (Polar Ozone and Aerosol Measurement) ozone observations for the same time period. Some differences with linear instability theory are noted as well as spectral peaks in the ozone field, not seen in the temperature field, that may be a consequence of advection.
